# MONDFLEISCH

## MONDFLEISCH IS ARNOLD SCHMIDT

an artist from Austria who lives in Vienna after working for years in Germany and the US. He does a variety of digital artwork including VR/AR work, fractals and short films. His educational background is in the social and natural science.

His work is an invitation to discover and reinvent oneself again and again - he wants to show that reality materializes, through the way we look at it. How it opens up to us through our values, dreams, hopes and views, that unobserved it remains just a wave in the sea of possibilities. The deconstruction of landscapes and social interactions are meant to illustrate this pictorially.

He wants to show how strongly the world views in our heads are shaped by language games of philosophy and sciences. And that the world remains indifferent to the pictures we paint of it.

He sees himself as an interdisciplinary worker, a mediator between art and science.

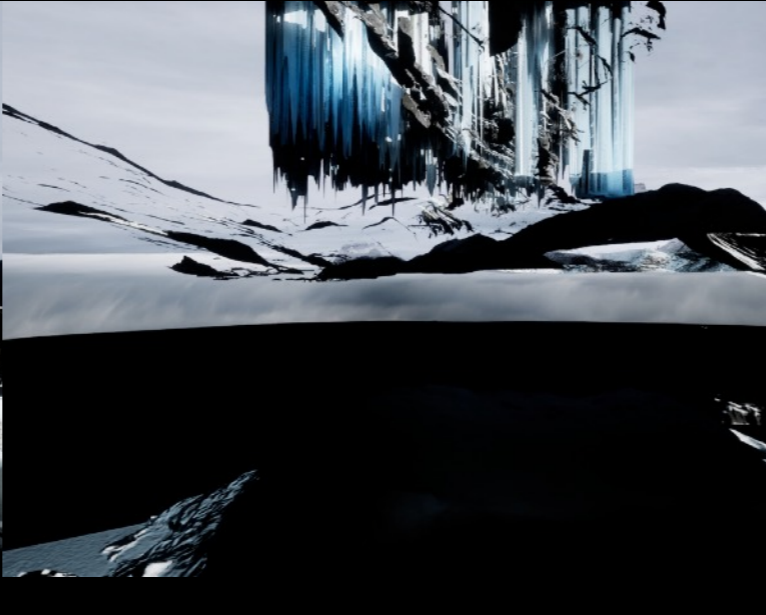

# #1 DECONSTRUCTION

landscapes

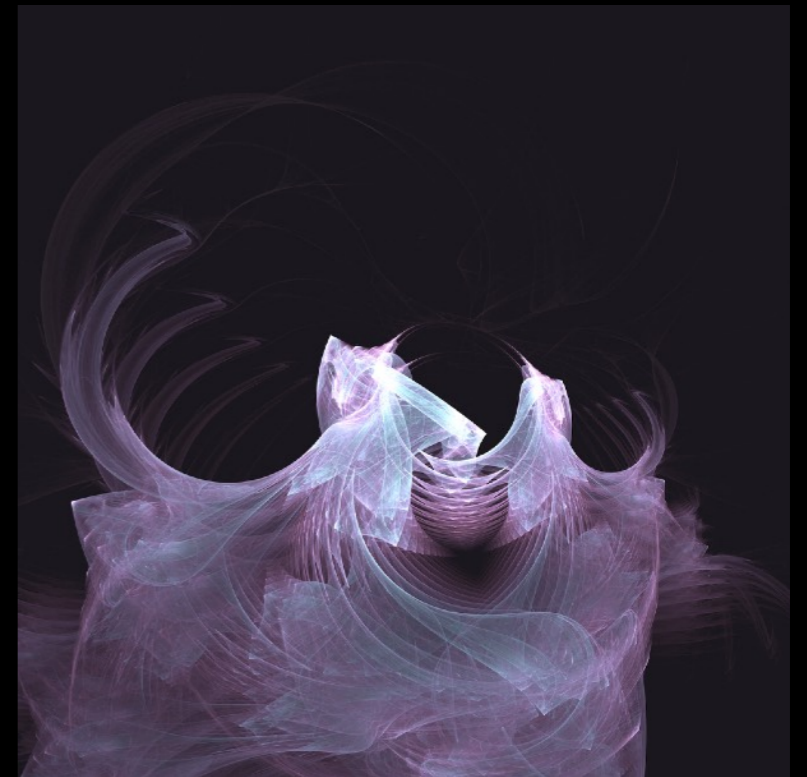

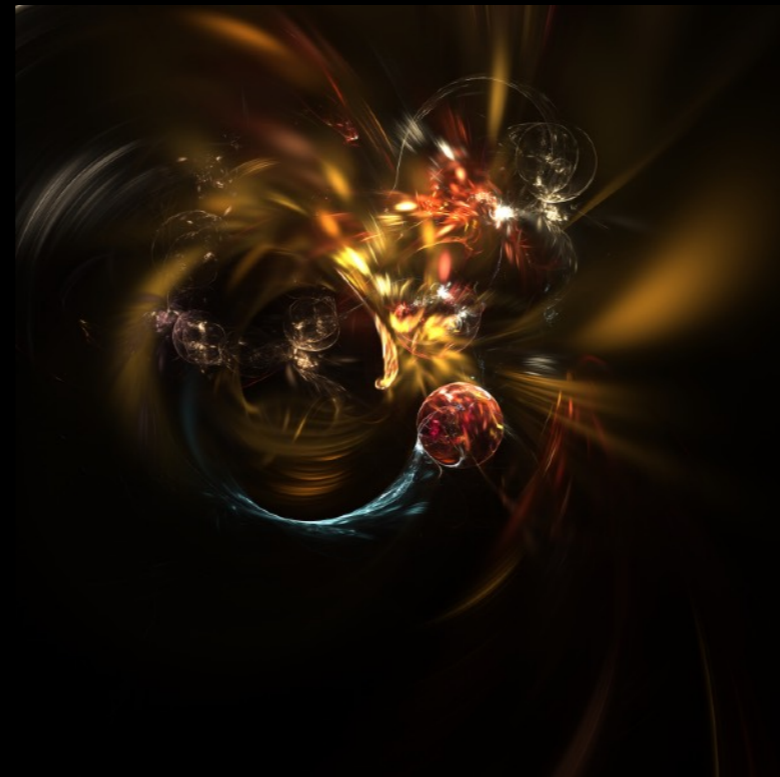

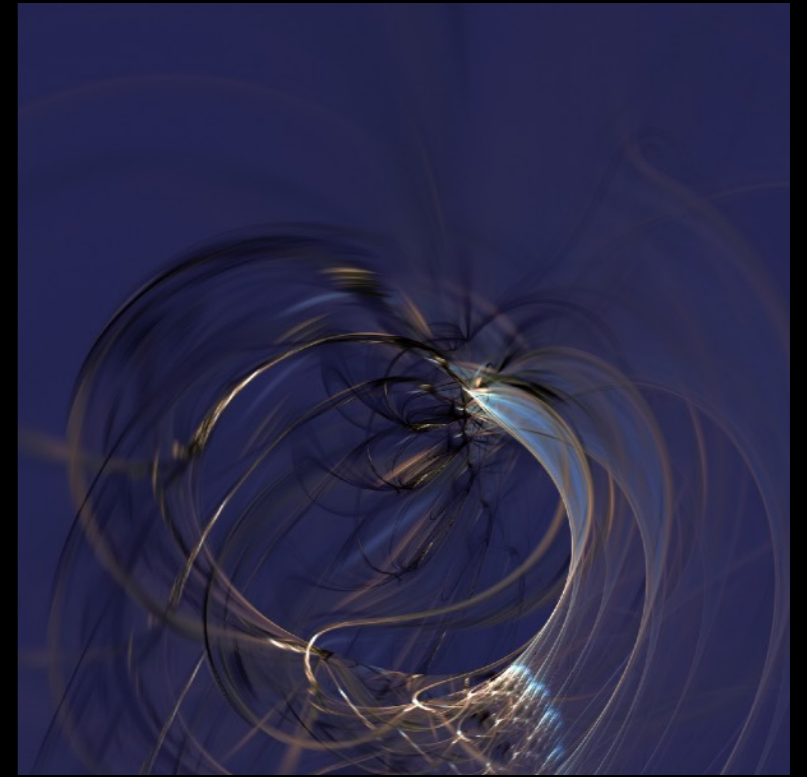

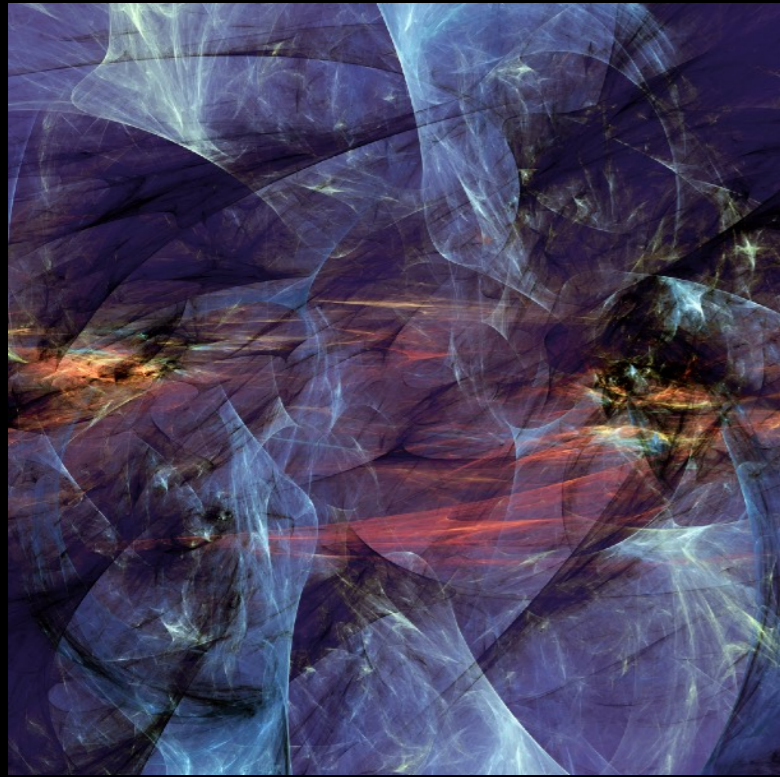

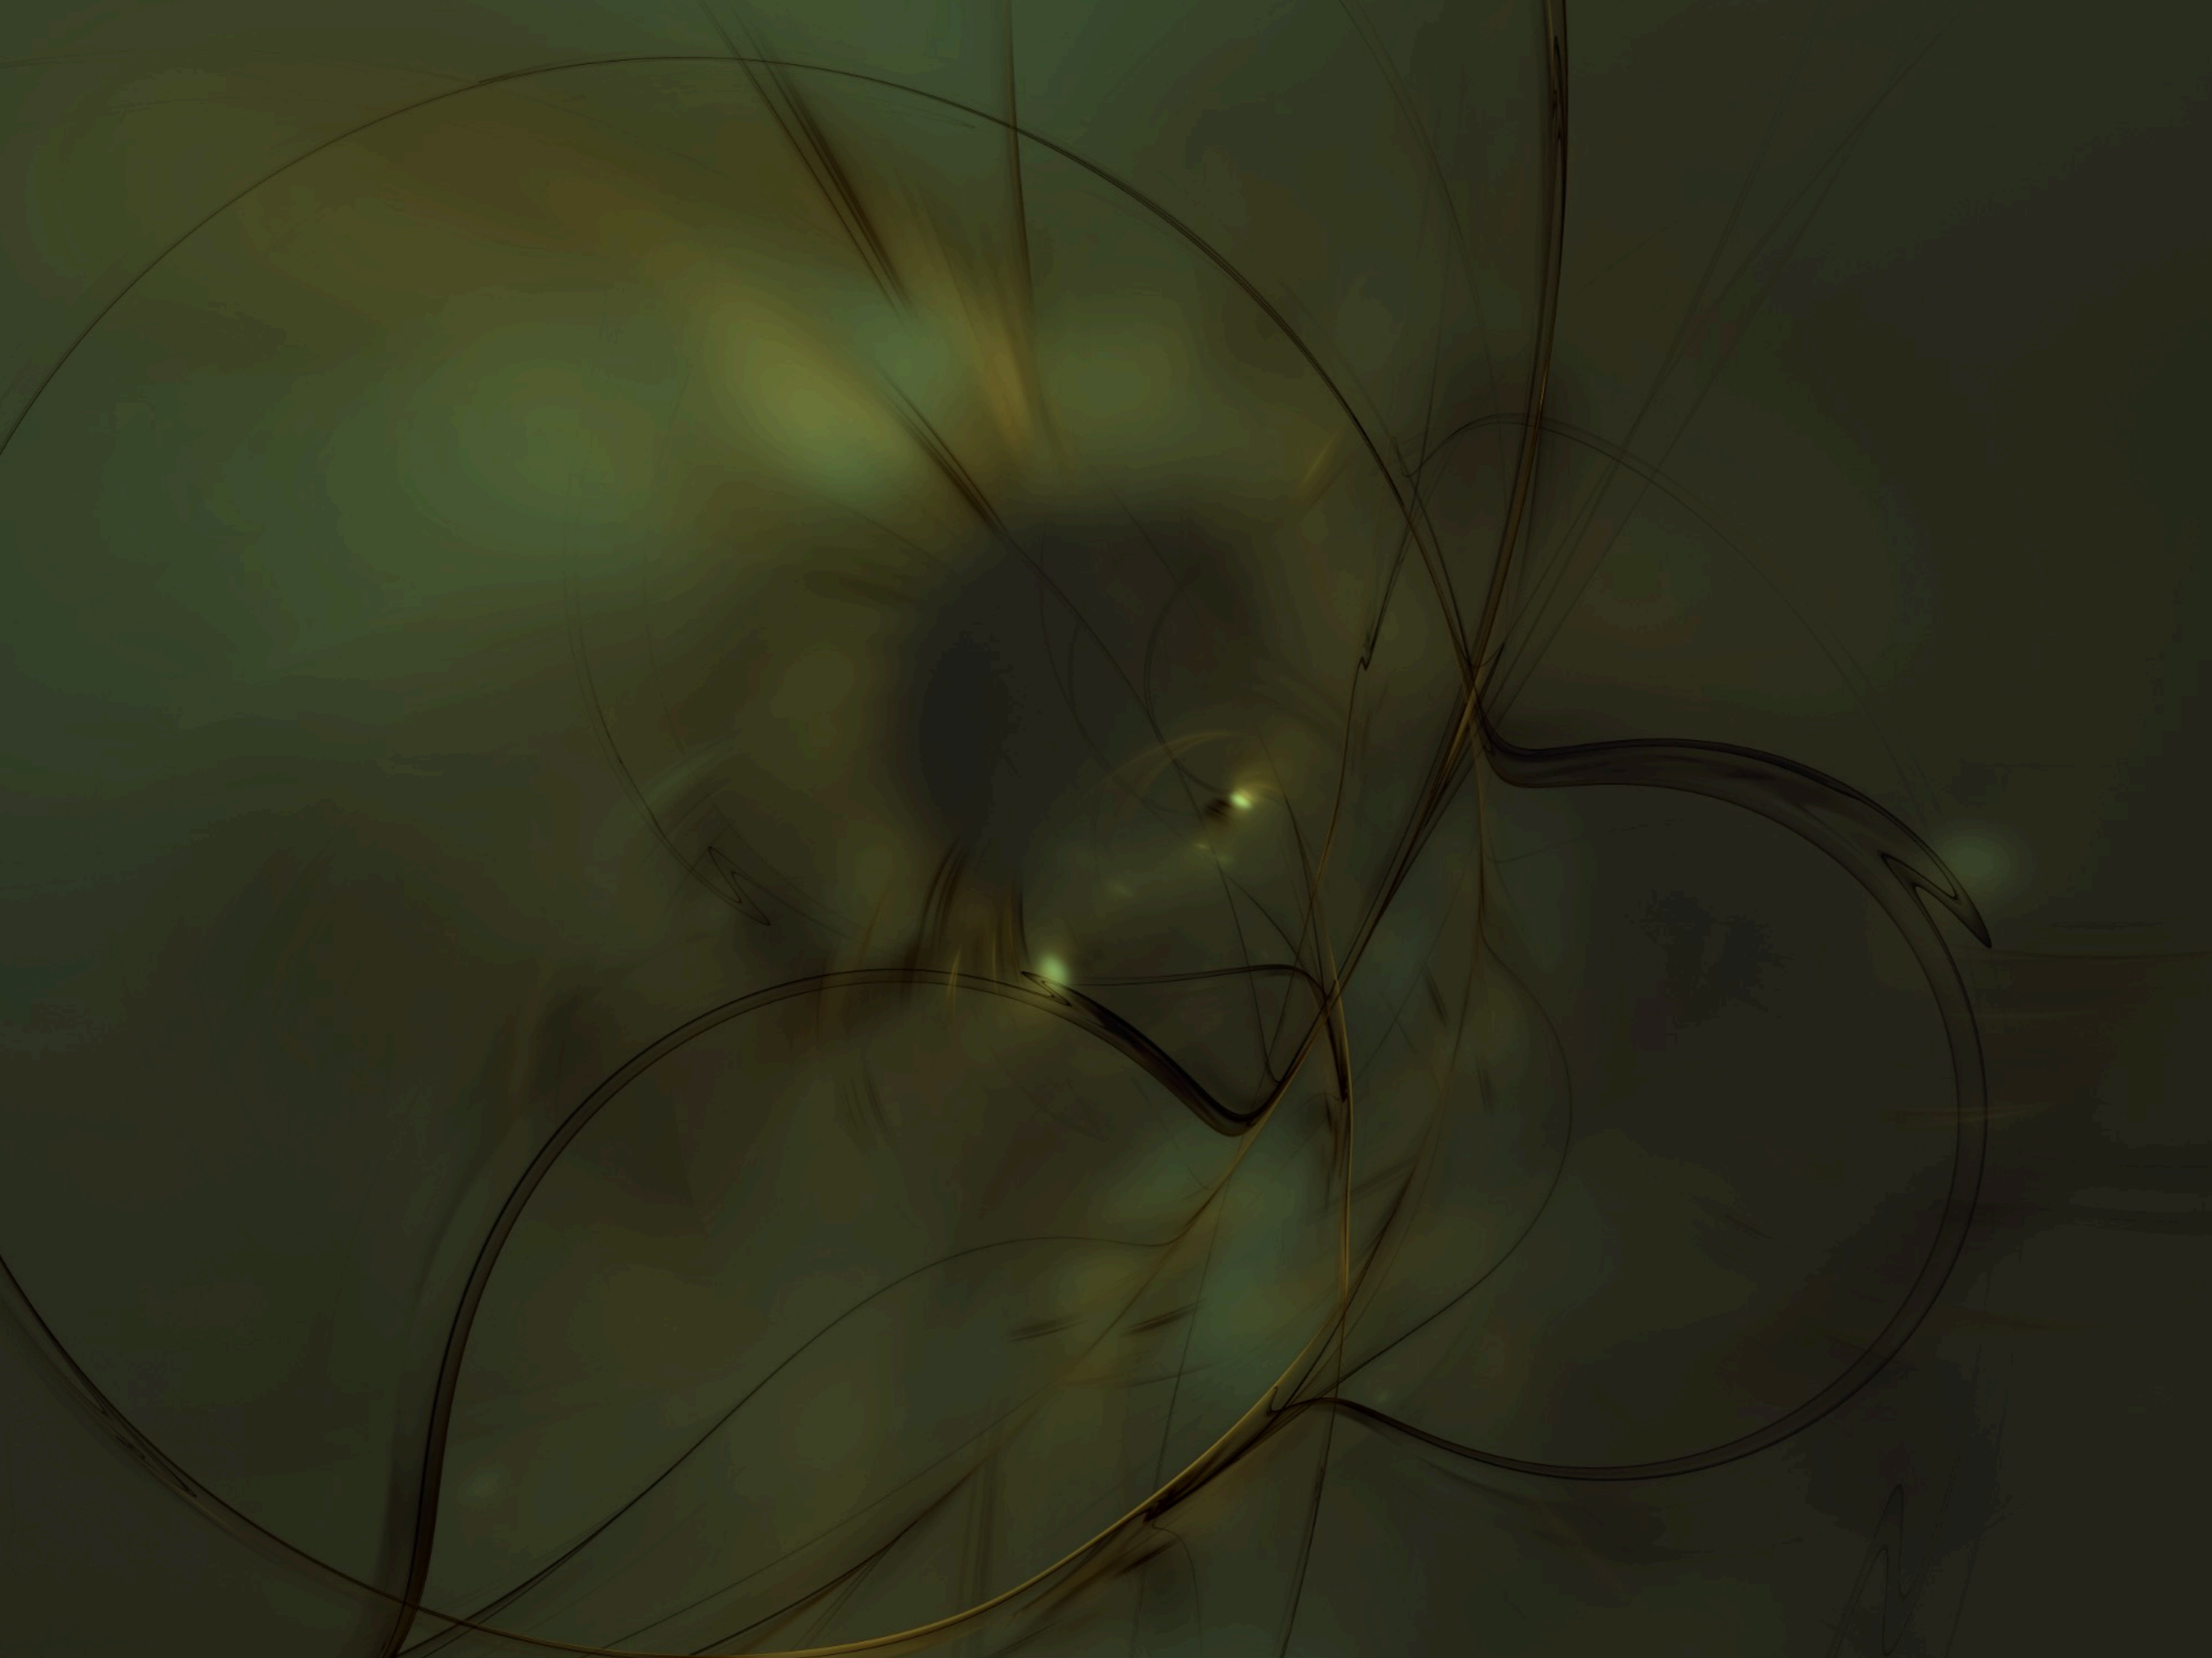

## #2 FRACTALS

the self similarity of nature

Fractal art is a digital art medium that generates pictures, based on geometry and recursion. The geometric shapes are equally „rough“ at all scales. No matter how close you look, they never get simpler.

# #3 PRESENCE

finding in the moment

## most recent exhibition

Brave new world  
Loft 8, gallery for contemporary art  
Nov 2022, Vienna
